Compliance Status: Compliance

In 2009, with new leadership and significant changes in its purpose and scope, the College of Coastal Georgia redefined its mission statement (only slightly modified in 2008 to reflect its name change), values and operating procedures to mirror its organizational maturation and position the College for funding and growth opportunities as one of the USG's preeminent state colleges in southeast Georgia.

The new mission statement resulted from work on the part of the campus-community Strategic Master Planning Committee, which included faculty, staff and student representation, and the President's Cabinet; with the latter affirming the revised mission that also included new vision and values statements. The new mission statement represents the core principles of an access institution, while incorporating goals to become a destination institution with strong scholarship, worthwhile community linkages, and exemplary student development. The new mission statement was approved by the USG Board of Regents in [August 2009](#).

The new mission statement of the College of Coastal Georgia reads as follows:
